Rodrigo Machado Schuler

IT Infrastructure & Support Coordination | ITSM | Technical Leadership | Scrum | ITIL

81 99618-1436 (WhatsApp) · rmschuler@gmail.com · linkedin.com/in/rmschuler · Recife, PE – Brazil

PROFESSIONAL SUMMARY

Senior Information Technology professional with over 16 years of solid experience in server infrastructure management, support of critical environments, team leadership and IT project coordination.

Specialist in IT governance using ITIL methodologies, ensuring operational continuity, high-availability solutions and strict SLA compliance. Proven technical leadership and people management skills, combining business strategy vision, agile methodologies (Scrum) and data intelligence (operational reports and dashboards in Power BI, plus automation). Known for turning technical challenges into strategic results and optimized processes.

SKILLS

Infrastructure & Operations

- IT infrastructure and operations management
- Windows and Linux server administration and support
- Virtualization: VMware and Hyper-V
- HPC environments and clusters
- SCCM, OpenShift and Tenable

Data & Monitoring

- Power BI: dashboards and KPI visualization
- Monitoring: Zabbix and Grafana

ITSM & Governance

- ITSM / ITIL and ServiceNow
- Incident, change and problem management
- SLA, KPI and operational reporting management
- Vulnerability, patch and compliance management
- Technical documentation and knowledge base
- Jira and asset management

Leadership & Agility

- Technical leadership, team development and feedback
- Operations and support coordination
- Scrum, agile methodologies and ceremony facilitation

PROFESSIONAL EXPERIENCE

Atos / Semantix · Technical Lead — Nov 2025 – Sep 2026

Technical leadership in the deployment, evolution and production delivery of Digital Engineering solutions, ensuring maintenance, monitoring and control for high operational reliability.

Key responsibilities and results

- **Technical Leadership:** Supported infrastructure, development and management teams in solving complex problems and driving critical activities during deployments. Active participation in meetings with POs, contributing to strategic decisions, removing impediments and acting as a facilitator for the development team.
- **Architecture & Integrations:** Implemented integrations between different digital engineering platforms, building an automated flow to extract and send data to Databricks. The data is consumed directly in interactive dashboards, providing real-time visibility. Delivery time dropped from months to under 4 hours.
- **Quality:** Built Power BI dashboards to control and monitor system connections and integrations, reducing service downtime by up to 98% and significantly increasing customer satisfaction.
- **Process Improvement:** Evolved deployment controls, replacing manual Excel management with integrated solutions in Power BI and Microsoft SharePoint.

Technologies: Power BI, AVEVA Global, AVEVA AIS, AVEVA PROII, AVEVA Marine, Microsoft SharePoint, ServiceNow, Jira, Databricks

Atos Brasil · IT Infrastructure and Support Coordinator — Jun 2022 – Oct 2025

Direct leadership of a multidisciplinary Infrastructure team of 13 professionals from the Servers and High Performance Computing (HPC) areas, driving skills development, performance management and a culture of continuous feedback, resulting in higher team engagement and improved productivity and operational quality indicators.

Key responsibilities and results

- **Technical Leadership:** Technical guidance for teams, definition of architectural solutions and contribution to infrastructure standards. Management of the ticket queue, SLA indicators, incidents, changes, problems and knowledge base.
- **Process Improvement:** Built Power BI dashboards to track server compliance indicators, resulting in 98% reported compliance. Defined a standard for patching servers and HPC clusters (onshore and offshore), cutting execution time from 4 weeks to 2 weeks across a fleet of 5,250 servers.
- **Infrastructure:** Standardized the orchestration flow for physical and virtual servers. Implemented automated pipelines with Ansible and Python, speeding up host provisioning and delivery.
- **Quality:** Reviewed and improved technical documentation, created knowledge-base standards and standardized support handling. Better problem analysis and resolution, 50% reduction in queue time and 100% SLA compliance. Formally recognized for delivery performance.

Technologies: Linux Red Hat, Windows, SCCM, OpenShift, Power BI, Python, PowerShell, VMware, Zabbix, Grafana, Tenable, ServiceNow, Indigo, Genetec, AVEVA Intelatrac, Ansible

Atos Brasil · Senior Application Support Analyst — Jan 2022 – Jun 2022

- **Environment and server administration:** Responsible for provisioning and deprovisioning in a private cloud.
- **Platform support:** Support for Lotus Domino/Notes and IBM Connect, with continuous monitoring via Zabbix and Grafana.
- **Security and compliance:** Patching, security controls and vulnerability management using Tenable.
- **IT service management:** Handled incidents, changes and configuration items in ServiceNow, ensuring SLA compliance.

Technologies: Windows Server, Linux, IBM Connect, IBM Lotus Domino/Notes, Zabbix, Grafana, ServiceNow

Proxxi Tecnologia · L2 Support Analyst — Aug 2018 – Dec 2021

- **Technical support:** Incident and request triage, working in second-level (L2) support, including installation and configuration of TEF and payment systems.
- **Infrastructure administration:** Management of Windows Server and Linux servers, as well as network devices.
- **Procedures and integrations:** Creation of procedures, testing and acceptance, and support for tool integrations.
- **Documentation and knowledge:** Recording of technical procedures, problems and known errors, plus knowledge-base administration.
- **Training:** Development and delivery of in-person and online training.

Technologies: ServiceNow, Windows Server, Linux openSUSE, Cisco, TEF, Grafana, Slack

Proxxi Tecnologia · Field Service Coordinator — Jan 2016 – Aug 2018

Managed a team of 30 field technicians serving commercial customers, focused on infrastructure and servers. Direct leadership, skills development and continuous feedback, promoting engagement and high performance. Responsible for implementing operational process improvements, ensuring efficiency, quality and customer satisfaction.

Key responsibilities and results

- **Technical Leadership:** Coordinated field operations teams in 5 states of Brazil's Northeast, meeting SLA and customer satisfaction targets. Improved service processes, reducing average handling time by 40% and optimizing technician travel logistics, resulting in greater efficiency and smoother service.
- **Quality and Modernization:** Continuously updated technical procedures, removing operational barriers and raising the service standard. The result was a 95% satisfaction rate, with recurring recognition for service excellence.
- **Cost and Efficiency:** Strategic restructuring of the technical team with optimized geographic distribution, reducing unnecessary travel. This lowered fuel consumption, significantly cut travel time and increased technician availability to respond quickly.

Technologies: ServiceNow, Excel, ITSM, IBM z/OS

Capgemini Consulting, Technology Outsourcing · Mid-level Infrastructure Analyst
Nov 2013 – Dec 2015

- **Server and infrastructure administration:** Support for Windows Server, Active Directory, DMZ and corporate network services environments.
- **Network services management:** Worked with FTP, DHCP, DNS, WINS, NLB, GPO/GPP, IIS, WSUS, VPN, file and print servers, plus tools such as Lotus Domino Administrator and RSA Authentication Manager.
- **Virtualization:** Administration of virtual servers using VMware vCenter, vSphere Client and Hyper-V.
- **Technical support and maintenance:** Support for corporate systems, configuration and maintenance of desktops and laptops, and installation of network and telecom equipment.

Technologies: Windows Server, VMware, RSA, IBM Domino/Notes, ITSM, Office

IBM Brasil · Junior Global Services Specialist — Mar 2011 – Nov 2013

- **Banking automation:** Support for Santander solutions, including ATMs and equipment from manufacturers such as Itautec, Procomp and Wincor, as well as workstations, printers and servers.
- **Migration project:** Took part in the rollout migrating Banco Real's system to the Santander platform.
- **Retail automation:** Support for retail automation solutions and Lenovo workstations.

Technologies: Windows, TEF, ECF

Hospital São Salvador · IT Support Coordinator — Nov 2010 – Mar 2011

Direct leadership and development of a multidisciplinary infrastructure and support team of 3 professionals, handling skills management and continuous feedback.

Key responsibilities and results

- **Technical Leadership:** Management of IT services and hospital technology operations, ensuring high availability, information security and continuous support for clinical activities.
- **Legacy Systems Modernization:** Upgraded server versions and optimized infrastructure, raising operational efficiency and improving performance for users.
- **Quality and Continuous Improvement:** Defined procedures and continuously improved technology processes, reducing downtime and ensuring greater service reliability.

Technologies: Windows Server, Oracle Server, Linux, ITSM, Zabbix

Vanguard-IT Solution · Junior Support Analyst – TSM Support — Aug 2010 – Nov 2010

- **Customer support:** Use of IBM TSM and ITM tools for monitoring, management and technical support.
- **Windows and Linux servers:** Installation and configuration of physical and virtual servers in VMware environments.
- **Wiki tools:** Creation and use of collaborative platforms for documentation and knowledge sharing.

Technologies: IBM Tivoli TSM, ITM, VMware, Wiki, Windows Server, Linux

Stefanini IT Solutions · Level 2 Support Technician – Service Desk — Oct 2008 – Sep 2010

- **Technical Support and Infrastructure:** Support for corporate systems, plus preventive and corrective maintenance, assembly and configuration of desktops and laptops.
- **Service and Incident Management:** End-to-end work in Service Desk and Incident Management processes, focused on fast ticket resolution and user support.

Technologies: Microsoft SQL Server, BDE Administrator, VNC, Microsoft Office, BrOffice, CRK, CDC

EDUCATION

- Bachelor's degree in Information Systems – Faculdade Santa Maria, 2009

CERTIFICATIONS & BADGES

- Certified ScrumMaster (CSM) – Scrum Alliance, 2025
- L2M – License to Manager – Atos Brasil, 2024
- ITIL V2 – IT Service Management Foundation, 2010
- Microsoft Certified Professional Specialist (MCPS) – Windows Server 2012, 2015
- Interskill – Mainframe Specialist: Linux Operations and Programming, 2020
- Cloud Service Management and Operations Explorer, 2020
- IBM Cloud Private: Foundation Technology; Infrastructure and Architecture; Installation and Configuration; CI/CD Pipelines, 2020
- IBM Cloud Essentials; IBM Cloud Core; Building Cloud-Native and Multicloud Applications, 2020
